TOTAL PERFORMANCE

Begins With Design

Eliminate the challenges of placement with ELAC's AUTO EQ

ELAC's new Premium subwoofer series provides unbeatable power and performance with a sleek, modern design. These new models deliver huge performance at an affordable price. With advanced features such as BASH Amplification, Advanced App Control and ELAC's revolutionary Auto EQ system, the new Premium Series is the perfect solution for completing your home theater or music setup.

PRODUCT DETAILS

Custom Design

Vinyl wrapped, elegant and acoustically balanced, 30mm cabinet, damped and internally braced eliminating unwanted resonance for maximum performance.

Custom Amplifier

Powerful BASH amplifier with Dual 4-channel DSP and 32-bit DACs. BLE APP control.

Custom Driver

Treated paper cone with a large 2.0" voice coil for increased power handling and thermal management, resulting in higher output SPL.

ELAC

FEATURES

PREMIUM SUBWOOFERS

POWERFUL • BOLD • DYNAMIC

● **DSP** (Digital Signal Processor) – A dual 28-Bit DSP with a 147mHz master clock frequency is utilized to process audio signals with high accuracy and minimum latency.

● **Treated Paper Cone** – These new high excursion woofers utilize a lightweight paper cone that has been treated to enhance stiffness and reduce any affects caused by temperature or humidity changes.

● **Large Diameter Voice Coils** – All three Premium Series subwoofers feature a large 2" voice coil for increased power handling and thermal management, resulting in higher output SPL.

● **Auto Room EQ** – Finding the perfect location for your subwoofer can be difficult or just not visually appealing. Utilizing our new Sub Control 3.0 app and your smartphone microphone, the subwoofer will optimize room EQ automatically, allowing greater flexibility in placement without sacrificing performance.

● **BASH Amplifier** – This new amplifier uses a modulated switched mode power supply allied to a conventional class AB amplifier.

Switching at more than 400,000 times per second, the supply tracks the incoming audio signal to ensure that the Class AB amplifier gets only the voltage necessary (with a little headroom) to cope with today's dynamic movie and music content, thus maximizing the efficiency and potential of the amplifier.

● **Advanced APP Control** – Doing away with traditional analog controls, our new Premium Series subwoofers incorporate our advanced digital control system. Simply download the ELAC Sub Control 3.0 app for your Android or iOS phone or tablet and you have complete control of multiple subwoofers from the comfort of your sofa.
